PREFACE

This report presents the results of an Air Force Occupational Survey of the Ground Radio Communications career ladder, Air Force Specialty Code (AFSC) 2E1X3. Authority for conducting occupational surveys is contained in AFI 36-2623. Computer products used in this report are available for use by operations and training officials.

The survey instrument was developed by Capt. Ian F. Jackson. Computer programming support was provided by Mrs. Jeanie C. Guesman and administrative support was provided by Ms. Dolores Navarro. Second Lieutenant Christopher Buchanan analyzed the data and wrote the final report. This report has been reviewed and approved by Lieutenant Colonel Roger W. Barnes, Chief, Airman Analysis Section, Occupational Analysis Flight, Air Force Occupational Measurement Squadron (AFOMS).

Copies of this report are distributed to Air Staff sections, major commands, and other interested training and management personnel. Additional copies are available upon request to AFOMS/OMYXI, 1550 5th Street East, Randolph Air Force Base, Texas 78150-4449, or by calling DSN 487-5543. For information on the Air Force occupational survey process or other on-going projects, visit our web site at <http://www.omsq.af.mil>.

SUMMARY OF RESULTS

1. **Survey Coverage:** The Ground Radio Communications career ladder was surveyed to provide current job and task data for use in updating career ladder documents and training programs. Survey results are based on responses from 2,084 AD, ANG, and AFRC Command respondents, which account for 50 percent of the total population surveyed.
2. **Specialty Jobs:** Nine jobs and 7 clusters were identified in the career ladder structure analysis. Eight of them are totally oriented toward technical task performance of the ground radio equipment maintenance and account for 60 percent of the population. Three jobs were identified that are typically performed by senior-level NCO's. The remaining five are primarily support, supervisory, and management in nature.
3. **Career Ladder Progression:** Skill-level progression for members of this AFSC is typical of most career ladders. Three-skill level personnel spend the vast majority of their job time performing technical tasks in the various ground radio jobs. At the 5-skill level, personnel are still heavily involved in ground radio technical tasks. Personnel at the 7-skill level begin to become involved with workcenter supervision. Air National Guard and Air Force Reserve 7-skill level personnel are more involved in technical tasks than their Active Duty counterparts.
4. **Training Analysis:** The current STS provides comprehensive coverage of the work performed by career ladder personnel. Some STS elements warrant review of proficiency coding based on survey data. Few tasks were not referenced to the STS.
5. **Job Satisfaction:** In general, job satisfaction among AFSC 2E1X3 personnel is low. Similar findings were noted when the current survey was compared to the previous survey and to the comparative sample of similar AFSCs. Respondents within the various ground radio maintenance job groups are far less satisfied with their jobs than the respondents in the Management and Training jobs. First-enlistment personnel responded with very low reenlistment intentions.
6. **Implications:** The current AFSC 2E1X3 career ladder structure reflects an overall normal job progression. Nine specific jobs and 7 clusters were identified in the career ladder. Career ladder training documents are well supported by survey data. Overall, job satisfaction is low among career ladder incumbents. Reenlistment intentions for first-enlistment airmen are very low.

**OCCUPATIONAL SURVEY REPORT (OSR)
GROUND RADIO COMMUNICATIONS
(AFSC 2E1X3)**

INTRODUCTION

This is a report of an occupational survey of the Ground Radio Communications career ladder conducted by the Air Force Occupational Measurement Squadron (AFOMS). The current Ground Radio Communications career ladder was created in November 1993 with the conversion from AFSC 304X4 to AFSC 2E1X3 under the "whole new classification system". Survey data will be used to identify current utilization patterns among career ladder personnel and evaluate career ladder documents and training programs. The last OSR published for the Ground Radio Communications career ladder was April 1994.

Background

As described in the AFMAN 36-2108 *Airman Classification*, dated 30 April 1999, Specialty Description dated 31 October 1995. Ground Radio Communications personnel install, maintain, overhaul, repair, modify fixed, mobile and transportable transmitters, receivers, transceivers, and related equipment.

Personnel entering the AFSC 2E1X3 career ladder must attend the Ground Radio Communications Apprentice course at Keesler AFB, MS lasting 33 weeks. Upon completion of this AFSC awarding course, the graduate is awarded the 3-skill level.

Entry into this career ladder currently requires an Armed Forces Vocational Aptitude Test Battery (ASVAB) score of Electrical - 67; a strength factor of "J" (Weight lift of 60 lbs.) is also required.

APPROVED FOR PUBLIC RELEASE; DISTRIBUTION UNLIMITED

SURVEY METHODOLOGY

Inventory Development

The data collection instrument for this occupational survey was USAF Job Inventory (JI) Occupational Survey Study Number (OSSN) 2329, dated April 1998. A tentative task list was prepared after reviewing pertinent career ladder publications and directives; pertinent tasks from the previous survey instrument, and data from the last OSR. The preliminary task list was refined and validated through personal interviews with 55 subject-matter experts (SMEs) at the following training location and operational installations:

<u>BASE</u>	<u>UNIT VISITED</u>
Keesler AFB MS	338 TRS/TTKRG 81 CS/SCMG 738 EIS/ISMR
Lackland AFB TX	37 CS
Robins AFB GA	5CCG/CTWW
Brooks AFB TX	68 IS/SCM
Hurlburt Field AFB FL	HQ AFSOC/SCML

The resulting JI contains a comprehensive listing of 675 tasks grouped under 14 duty headings, and a background section requesting such information as grade, base, MAJCOM assigned, organizational level, schedule or shift worked, job title, test equipment used or operated, GRCE operated or maintained, general shop or auxiliary equipment maintained, and vehicles used.

Survey Administration

From July 1998 through November 1998, base-training offices at operational units worldwide administered the inventory to eligible AFSC 2E1X3 personnel. Job incumbents were selected from a computer-generated mailing list obtained from personnel data tapes maintained by the Air Force Personnel Center, Randolph AFB TX. Each individual who completed the inventory first completed an identification and biographical information section and then checked each task performed in his or her current job. After checking all tasks performed, each member then rated each of these tasks on a 9-point scale, showing relative time spent on that task, as compared to all other tasks checked. The ratings ranged from 1 (very small amount time spent) through 5 (about average time spent) to 9 (very large amount time spent). To determine

relative time spent for each task checked by a respondent, all of the incumbent's ratings are assumed to account for 100 percent of his or her time spent on the job and are summed. Each task rating is then divided by the total task ratings and multiplied by 100 to provide a relative percentage of time for each task. This procedure provides a basis for comparing tasks in terms of both percent members performing and average percent time spent.

Survey Sample

Personnel were selected to participate in this survey so as to ensure an accurate representation across major commands (MAJCOM) and military pay grade groups. All eligible AD, ANG, and AFRC AFSC 2E1X3 personnel were mailed survey booklets. Table 1 reflects the percentage distribution, by MAJCOM, of assigned AFSC 2E1X3 personnel as of July 1998. The 2,084 respondents in the final sample represent 46 percent of the total assigned personnel and 50 percent of the total personnel surveyed. Table 2 reflects the paygrade distribution for these AFSC 2E1X3 personnel.

TABLE 1

COMMAND DISTRIBUTION OF AFSC 2E1X3 PERSONNEL

COMMAND	PERCENT OF ASSIGNED*	PERCENT OF SAMPLE
AETC	7	12
AFSOC	2	3
AFMC	9	8
AFSPC	3	3
PACAF	7	7
ACC	17	20
USAFE	8	10
AIA	5	6
AMC	6	8
AFRC	5	4
ANG	27	15
Other	4	4

TOTAL ASSIGNED* = 4,526

TOTAL SURVEYED** = 4,170

TOTAL IN SURVEY SAMPLE = 2,084

PERCENT OF ASSIGNED IN SAMPLE = 46%

PERCENT OF SURVEYED IN SAMPLE = 50%

* Assigned strength as of July 1998

** Excludes personnel in PCS, student, or hospital status, or less than 6 weeks on the job

TABLE 2
PAYGRADE DISTRIBUTION OF SURVEY SAMPLE

GRADE	PERCENT OF ASSIGNED*	PERCENT OF SAMPLE
E-1 - E-3	10	14
E-4	25	25
E-5	30	29
E-6	20	18
E-7	15	14

* Assigned strength as of July 1998

Both command and paygrade distribution of the survey sample are close to the percent assigned. This indicates the sample is a true representation of the career ladder population.

Task Factor Administration

Job descriptions alone do not provide sufficient data for making decisions about career ladder documents or training programs. Task factor information is needed for a complete analysis of the career ladder. To obtain the needed task factor data, selected senior AFSC 2E1X3 personnel (generally E-6 or E-7 craftsmen) also completed a second booklet for either training emphasis (TE) or task difficulty (TD). These booklets were processed separately from the JIs. This information is used in a number of different analyses discussed in more detail within the report.

Training Emphasis (TE): TE is a rating of the amount of emphasis that should be placed on tasks in entry-level training. The 51 senior NCOs who completed a TE booklet were asked to select tasks they felt require some sort of structured training for entry-level personnel and then indicate how much training emphasis these tasks should receive, from 1 (extremely low emphasis) to 9 (extremely high emphasis). Structured training is defined as training provided at resident training schools, field-training detachments (FTD), mobile training teams (MTT), formal on-the-job-training (OJT), or any other organized training method. Interrater agreement for these 51 raters was acceptable. The average TE rating was 2.43, with a standard deviation of 1.48. Any task with a TE rating of 3.91 or above is considered to have high TE.

Task Difficulty (TD): TD is an estimate of the amount of time needed to learn how to do each task satisfactorily. The 63 senior NCOs who completed TD booklets were asked to rate the difficulty of each task using a 9-point scale (extremely low to extremely high). Interrater reliability was acceptable. Ratings were standardized so tasks have an average difficulty of 5.00 and a standard deviation of 1.00. Any task with a TD rating of 6.00 or above is considered to be difficult to learn.

When used in conjunction with the primary criterion of percent members performing, TE and TD ratings can provide insight into first-enlistment personnel training requirements. Such insights may suggest a need for lengthening or shortening portions of instruction supporting entry-level jobs.

SPECIALTY JOBS (Career Ladder Structure)

The first step in the analysis process is to identify the structure of the career ladder in terms of the jobs performed by the respondents. The Comprehensive Occupational Data Analysis Program (CODAP) assists by creating an individual job description for each respondent based on the tasks performed and relative amount of time spent on these tasks. The CODAP automated job clustering program then compares all the individual job descriptions, locates the two descriptions with the most similar tasks and time spent ratings, and combines them to form a composite job description. In successive stages, CODAP either adds new members to this initial group, or forms new groups based on the similarity of tasks and time spent ratings.

The basic group used in the hierarchical clustering process is the Job. When two or more jobs have a substantial degree of similarity, in tasks performed and time spent on tasks, they are grouped together and identified as a Cluster. The structure of the career ladder is then defined in terms of jobs and clusters of jobs.

Overview of Specialty Jobs

Based on the analysis of tasks performed and the amount of time spent performing each task, 9 independent jobs and 7 clusters were identified within the career ladder. Figure 1 illustrates the jobs and clusters performed by AFSC 2E1X3 personnel.

A listing of these jobs and clusters is provided below. The stage (ST) number shown beside each title references computer printed information, the letter "N" indicates the number of personnel in each group.

- I. Maintenance Control Cluster (ST70, N=66)
- II. High Frequency Cluster (ST97, N=72)
- III. Public Address Installation Job (ST340, N=17)
- IV. Public Address Cluster (ST110, N=61)
- V. Entry Level Maintenance Job (ST408, N=10)
- VI. Ground Radio Maintenance Cluster (ST104, N=883)
- VII. Munitions Support Maintenance Job (ST308, N=8)
- VIII. Ground Radio Inshop Cluster (ST71, N=96)
- IX. Contingency Cluster (ST118, N=41)
- X. LMR Manager Job (ST287, N=18)

- XI. Contract Administration Job (ST383, N=15)
- XII. Maintenance Supply Job (ST218, N=10)
- XIII. Manager/Supervisor Cluster (ST81, N=442)
- XIV. Quality Assurance Job (ST266, N=17)
- XV. Training Manager Job (ST446, N=5)
- XVI. Instructor Job (ST202, N=42)

The respondents forming these jobs and clusters account for 86 percent of the survey sample. The remaining 14 percent, for one reason or another, did not group into one of these jobs.

**AFSC 2E1X3 CAREER LADDER SPECIALTY JOBS
(N = 2,084)**

* Other includes: PA Installation, Entry-Level Maintenance, Munitions Support, LMR Manager, Contract Administration, Maintenance Supply, Quality Assurance, and Training Manager

FIGURE 1

Group Descriptions

The following paragraphs contain brief descriptions of the jobs identified through the career ladder structure analysis. Table 3 presents the relative time spent on duties by members of these specialty jobs. Selected background data for these jobs are provided in Table 4. Representative tasks for all the groups are contained in Appendix A. Table 5 shows a job comparison between the current and 1994 surveys.

I. MAINTENANCE CONTROL CLUSTER (ST70). The 66 airmen forming this job (3 percent of the survey sample) represent members who spend the majority of their time performing Maintenance Management activities. They spend 48 percent of their time performing the Maintenance Management tasks of Duty J and another 11 percent performing Mobility and Contingency activities (Table 3). Two independent jobs were identified within this cluster and were distinguished by the amount of time spent within duties. Job titles identified include Maintenance Control and Mobility Maintenance Control. The 32 members of the Maintenance Control job spend 59 percent of their performing maintenance management activities of Duty J while members of the Mobility Maintenance Control job reported spending 36 percent of their time performing mobility and contingency activities of Duty I. They perform an average of 33 tasks which include:

- Analyze core automated maintenance systems
- Retrieve CAMS or G081 listings or reports
- Review maintenance records
- Review preventive maintenance schedules
- Initiate or annotate maintenance records
- Coordinate repair actions between users and contractors
- Verify accuracy of CAMS daily inputs
- Coordinate maintenance of equipment with agencies
- Update historical reports
- Conduct on the job training
- Maintain or update status indicators such as graphs or charts

The predominant paygrade of this cluster are E-4 and E-5 with an average of almost 8 years in the career ladder. Eighty-nine percent are AD and 11 percent ANG. Fifteen percent of these respondents hold the 7-skill level and 71 percent hold the 5-skill level. Sixty percent of the members in Maintenance Control reported supervising other members. Sixty-eight percent of these members report they are assigned to units within the United States (Table 4).

II. HIGH FREQUENCY CLUSTER (ST97). The 72 airmen performing this job (3 percent of the survey sample) represent Ground Radio personnel who perform component or fault isolation maintenance tasks. Twenty-seven percent of their time is dedicated to Ground Radio Maintenance tasks of Duty C and 30 percent to the Component Troubleshooting activities of Duty F (Table 3). Specific jobs within this cluster were identified which separates the cluster into HF Technicians and Inshop HF. The Inshop Technicians perform the majority of their tasks inshop while the HF Technicians perform their tasks on-site. Members of this cluster perform an average of 63 tasks which include:

- Remove or replace resistors
- Remove or replace capacitors
- Bench check resistors
- Bench check capacitors
- Remove or replace relays
- Bench check relays
- Align or adjust power amplifiers
- Solder communications equipment components
- Operationally check power amplifiers
- Isolate malfunctions within power amplifiers
- Remove or replace HF equipment or subassemblies

Sixty-eight percent of these job incumbents hold the 5-skill level and 3 percent the 7-skill level (Table 4). The predominant paygrades are E-4 and E-5 with 32 percent reporting they supervise others. Ninety-three percent report they are AD, 6 percent ANG and 1 percent reported being AFRC. Sixty-four percent are assigned to units within the United States.

III. PUBLIC ADDRESS INSTALLATION JOB (ST340). The 17 airmen forming this job (less than one percent of the survey sample) are distinguished by spending 71 percent of their time on Installing and Maintaining Public Address System activities of Duty H (Table 3). Another 8 percent of their time is spent performing Ground Radio Maintenance activities of Duty C. Members of this specific job reported performing an average of only 18 tasks, indicating their specialization in PA systems. Typical of the tasks performed include:

- Operationally check PA systems
- Conduct location surveys for PA systems
- Set up or tear down portable PA systems
- Coordinate support requests for PA systems with appropriate agencies
- Align or adjust PA systems
- Fabricate audio cables for PA systems
- Install fixed PA systems

Coordinate purchases of PA systems or equipment with appropriate agencies
Bench check PA system components
Isolate malfunctions within PA systems to LRU's

All of these airmen are AD with an average of 78 months in the career field and 79 months in the service. The predominant paygrades are E-4 and E-5 with 35 percent reporting they supervise others. Twenty-four percent hold the 3-skill level and seventy-six percent hold the 5-skill level (Table 4).

IV. PUBLIC ADDRESS CLUSTER (ST110). Comprising 3 percent of the survey sample, these 61 airmen reported spending 23 percent of their time Installing and Maintaining PA systems of Duty H (Table 3). Another 22 percent of their time is spent performing General Ground Radio Maintenance of Duty C. Within the PA cluster there were three distinct jobs identified, PA Supervisors, PA Technicians and PA Entry-Level Technicians. The PA Supervisors were distinguished by supervisory tasks performed, while the Technicians had higher TAFMS and performed more tasks than the Entry-level Technicians. Members of this cluster reported performing an average of 68 tasks which include:

Set up or tear down portable PA systems
Align or adjust public address PA systems
Operationally check PA systems
Fabricate audio cables for PA systems
Conduct location surveys for PA systems
Bench check PA system components
Coordinate support requests for PA systems with appropriate agencies
Install fixed PA systems
Coordinate purchase of PA systems or equipment with appropriate agencies
Isolate malfunctions within PA systems to LRU's
Align or adjust transceivers
Operationally check public address systems

Fifty-four percent of these job incumbents hold the 5-skill level with 26 percent holding the 7-skill level. Eighty-three percent reported as being AD, 10 percent ANG, and 7 percent AFRC. Fifty-two percent report they are supervisors and 77 percent of the job incumbents are assigned to units within the United States (Table 4).

V. ENTRY-LEVEL MAINTENANCE JOB (ST205). The 10 members of this job spend most of their time, 38 percent, performing the General Ground Radio Maintenance tasks of Duty

C (Table 3). This group of airmen has the lowest TAFMS than any other group in the career field. They account for less than one percent of the career ladder and are all AD. These airmen perform an average of only 29 tasks including:

- Isolate malfunctions within receivers
- Bench check HF receivers or subassemblies
- Align HF equipment or subassemblies
- Align or adjust receivers, other than DF receivers
- Operationally check receivers, other than GPS
- Remove or replace HF equipment or subassemblies
- Bench check capacitors
- Remove or replace receivers
- Isolate malfunctions within independent/single sideband equipment
- Align or adjust independent /single sideband equipment
- Bench check resistors
- Perform corrosion prevention on GRCE

Fifty percent of the members of this job hold the 3-skill level and another 50 percent report holding the 5-skill level. All of members within this job reported calling themselves Ground Radio Technicians. The predominant paygrades of these members are E-3 and E-4. None of these members reported supervising anybody (Table 4).

VI. GROUND RADIO MAINTENANCE CLUSTER (ST104). Comprising 43 percent of the survey sample, these 883 airmen represent the core job of the career ladder. Twenty-nine percent of their time is spent performing tasks of Duty C while another 11 percent of their time is spent on Duty E (Table 3). Within this cluster there were 10 separate jobs identified. The first job identified, Secure Radio Technician, are all assigned to USAFE and 50 percent of the members reported working in the Global Command area. These 6 members are all AD and perform an average of 105 tasks. The members of the second job, Maintenance Supervisor, perform standard ground radio tasks but also spend 18 percent of their time performing Management and Supervisory activities. Eighty-nine percent of the Maintenance Supervisor personnel reported supervising others. The next job identified is the core of ground radio. These Core Ground Radio maintenance members spend the majority of their time performing Ground Radio maintenance activities (34 percent). The 321 members of the Core Ground Radio perform an average of 139 tasks, which shows the broad range of their job. Members of the fourth job identified, Mobility, also perform general maintenance duties but also spend 20 percent of their time performing Mobility and Contingency activities. The 94 members that make up the Subassembly job spend 16 percent of their time performing Subassembly maintenance as well as general ground radio maintenance. Subassembly is made up of 64 percent AD, 33 percent ANG, and 3 percent AFRC. The next job identified, AG Ground Radio Installation, is made up

primarily of Air Guard (83 percent). These members spend 30 percent of their time performing Ground Radio Installation task of Duty B. The 7 members of the next job, Component Level, spend 33 percent of their time performing Component Level Troubleshooting tasks of Duty F. The majority of their top tasks performed deal with removing and replacing various radio components. Members of the next job, Missile Radio, spend more time than any other group maintaining Missile/Alert Radio systems. All of the 11 members reported their job title as Missile Maintenance and Missile Radio as their primary work area. AG account for the majority of the next job identified (95 percent). These guard members spend 21 percent of their time Installing Ground Radio Communications as well as spending another 23 percent of their time performing general ground radio maintenance. All of the members in the last job identified within the cluster, Intelligence Equipment Maintenance, reported working in the Intel organization. Representative tasks of this cluster include:

- Operationally check UHF VHF equipment
- Operationally check transceivers
- Align or adjust UHF or VHF equipment
- Isolate malfunctions within transceivers
- Isolate malfunctions within UHF or VHF equipment
- Align or adjust transceivers
- Bench check UHF or VHF transceivers or subassemblies
- Solder communications equipment components, other than high-reliability soldering
- Align UHF or VHF equipment or subassemblies
- Remove or replace UHF or VHF equipment
- Operationally check power amplifiers
- Remove or replace transceivers
- Isolate malfunctions within receivers
- Remove or replace UHF or VHF equipment or subassemblies

Fifty-one percent of these members hold a 5-skill level and 23 percent the 7-skill level. The average time in the career ladder is 7 years, with an average 7 1/2 years in service. The predominant paygrades of this job are E-4 and E-5. Seventy-six percent are AD, 20 percent ANG and 4 percent are AFRC. Furthermore, 75 percent of these members report they are assigned within the United States (Table 4).

VII. MUNITIONS SUPPORT MAINTENANCE JOB (ST308). The 8 airmen performing this job (less than 1 percent of the survey sample) represent Ground Radio Maintenance personnel who are assigned to units dealing with munition support. Forty-three percent of their time is spent performing tasks associated with Ground Radio Maintenance of Duty C while another 32 percent of their time is spent on LRU level maintenance of Duty D. They perform an average of only 67 tasks which shows the focus of their job, some of which include:

- Operationally check land lines
- Operationally check battery backup systems
- Remove or replace transceivers
- Isolate malfunctions to land lines
- Operationally check communications consoles
- Isolate malfunctions within communications consoles to LRU's
- Remove or replace battery backup system LRU's
- Operationally check battery chargers
- Operationally check public address systems
- Remove or replace UHF or VHF equipment
- Remove or replace power amplifiers
- Remove or replace ECCM equipment LRU's

All of the members reporting in this job are AD. Twelve percent hold the 3-skill level and 88 percent the 5-skill level. The predominant paygrades are E-4 and E-5 with an average 6 years in the career ladder. Twelve percent of these job incumbents report they supervise others. Thirteen percent of the AD members are in their first enlistment (Table 4).

VIII. GROUND RADIO INSHOP CLUSTER (ST71). The 96 airmen forming this job (5 percent of the survey sample) spend 39 percent of their time performing General Ground Radio Maintenance tasks of Duty C (table 3). There were 4 separate jobs identified within this cluster. The first job, Core Inshop, is the core of the cluster spending 74 percent of their time performing tasks of Duty C. Sixty percent of these members reported calling themselves Ground Radio Technicians. The second job identified, AFRC Inshop, is primarily made up of Air Reserve members (60 percent). These members of this job reported spending 31 percent of their time performing Ground Radio Maintenance (31 percent) as well as Mobility and Contingency activities (29 percent). The 8 members of the next job identified, Mobility Support, spend 34 percent of their time performing Mobility and Contingency activities. The last job that was identified was primarily made up of Guard members (74 percent). These members of this job, AG Engineering and Installation, spend 37 percent of their time Installing Ground Radio Communication equipment. Distinct tasks of this cluster include:

- Operationally check transceivers
- Isolate malfunctions within transceivers
- Align or adjust UHF or VHF equipment
- Isolate malfunctions within UHF or VHF equipment
- Align or adjust transceivers
- Operationally check UHF or VHF equipment
- Remove or replace transceivers
- Fabricate RF cables
- Remove or replace UHF or VHF equipment
- Solder communications equipment components, other than high-reliability

Fire weapons for proficiency
Install cabling

The predominant paygrade in this job is E-4. Their average time in service is just over 4 1/2 years with an average time in the career field of just under 4 years. Fifty percent of job incumbents are AD, 33 percent ANG and 17 percent AFRC. Sixty-one percent of these respondents hold the 5-skill level and 20 percent hold the 7-skill level. Three-skill level personnel account for 19 percent of this job with 49 percent reporting they are in their first-enlistment. Eighty-four percent of these members report they are assigned to units within the United States (Table 4).

IX. CONTINGENCY CLUSTER (ST118). The 41 airmen forming this job (2 percent of the survey sample) report spending 57 percent of their time performing Mobility and Contingency activities of Duty I and 10 percent of their time performing General Ground Radio Maintenance activities of Duty C (Table 3). Within in this cluster there were 3 separate jobs identified: Mobility Planner, Mobility, and Mobility Maintenance. These three jobs are very similar in that their top performing duty is Mobility and Contingency activities. The factor that sets them apart is the tasks they perform. The Mobility Planners spend an additional 17 percent of their time performing Training activities. Mobility and the Mobility Maintenance group perform general mobility tasks but the Mobility Maintenance are more involved with the maintenance aspect. The cluster averages 36 tasks which include:

- Erect tents
- Fire weapons for proficiency
- Inspect mobility bags or kits
- Don or doff chemical warfare personal protective clothing
- Prepare equipment for deployments
- Pack or palletize mobility or contingency equipment for shipment or movement
- Perform pallet buildup activities
- Inspect packed or palletized mobility or contingency equipment prior to transport
- Perform camouflage procedures
- Lay electrical or communications equipment
- Identify chemical warfare agents
- Perform first aid
- Tear down, inspect, clean, and reassemble weapons, such as M-16 rifles

Forty-six percent of these job incumbents are AD; 49 percent are ANG and 5 percent AFRC. The predominant paygrades are E-5 and E-6 with 33 percent of them in their first enlistment and 15 percent reporting supervising others. The AD members average just over 9 years in the career ladder and just over 10 years in the service. Sixty-three percent of these members hold the 5-skill

level and 24 percent the 7-skill level. Seventy-six percent of the members are assigned to units within the United States (Table 4).

X. LAND MOBILE RADIO MANAGER JOB (ST287). Comprising another 1 percent of the survey sample, these 18 airmen perform the tasks associated with mobile radio units. Twenty-five percent of their time is spent performing the Contract Administration tasks of Duty A and another 19 percent of their time is spent on Supply and Equipment activities (Table 3). Sixty-seven percent of these members call themselves Land Mobile Radio Manager and all of them listed Land Mobile Radio as their primary work area. These job incumbents average only 34 tasks which include:

- Coordinate maintenance of equipment with appropriate agencies
- Operationally check LMR equipment
- Inventory equipment, tools, parts or supplies
- Evaluate serviceability of equipment, tools, parts, or supplies
- Perform QAE performance evaluations
- Monitor maintenance contract agreements
- Isolate malfunctions within LMR equipment
- Remove or replace LMR equipment
- Conduct installation site surveys
- Issue or log turn-ins of equipment, tools, parts, or supplies
- Process call orders
- Maintain organizational equipment or supply records

Seventy-eight percent of these airmen hold the 5-skill level and 6 percent the 7-skill level. All of these job incumbents are AD with 17 percent in their first enlistment. They average 8 years in the career ladder with a predominant paygrade of E-5. Sixty-one percent of these airmen are assigned to units within the United States (Table 4).

XI. CONTRACT ADMINISTRATION JOB (ST383). The 15 members of this job perform the tasks associated with Contract Administration. As reflected in Table 3, these job incumbents spend 80 percent of their time performing the tasks associated with the Contract Administration activities of Duty A, the highest of any other job. They average 19 tasks and spend only 9 percent of their time performing the Management and Supervisory tasks of Duty K, indicating they are not supervisors but perform contract duties as represented below:

- Draft inputs to performance work statements
- Draft inputs to statements of work
- Participate in request for proposal meetings
- Prepare changes or amendments to contract data requirements lists
- Write SOW's

- Research SOW's
- Perform QAE performance evaluations
- Process PWS's
- Process SOW's or SOW amendments
- Research PWS's
- Monitor maintenance contract agreements
- Certify commercial service contracts for GRCE
- Draft sole source requests
- Maintain GRCE contract files

All of these job incumbents are AD with 80 percent holding the 7-skill level. The predominant paygrade is E-6 averaging 18 years in the service (Table 4).

XII. MAINTENANCE SUPPLY JOB (ST218). Comprising 1 percent of the survey sample, these 10 airmen are performing supply and equipment duties. Fifty-two percent of their time is spent performing the tasks associated with General Supply and Equipment activities and 15 percent Installing Ground Radio Communication activities (Table 3). These job incumbents perform an average of only 20 tasks which indicates the narrow focus of their job. Representative tasks include:

- Inventory equipment, tools, parts, and supplies
- Evaluate serviceability of equipment, tools, parts, and supplies
- Pick up, deliver, or store equipment, tools, parts, or supplies
- Identify and report equipment or supply problems
- Coordinate maintenance of equipment with appropriate agencies
- Maintain organizational equipment or supply records
- Initiate requisitions for equipment, tools, parts, or supplies
- Install LAN Category 5 systems
- Install local area network fiber-optic systems
- Install fiber-optic links
- Maintain documentation on items requiring periodic inspections or calibrations
- Establish procedures for accountability of equipment , tools, parts, or supplies

Eighty percent of these members hold a 5-skill level, 20 percent hold the 7-skill level and all are AD. The average time in the career ladder is 94 months, with an average 107 months in service. The predominant paygrade of this jobs E-4. Furthermore, 60 percent of these members report they are assigned within the United States (Table 4).

XIII. MANAGEMENT/SUPERVISION CLUSTER (ST81). The 442 airmen forming this job (21 percent of the survey sample) are distinguished by spending 43 percent of their time on Management and Supervisory activities Duty K and another 12 percent on Training activities of Duty L (Table 3). There were 5 distinct jobs identified within the cluster. The first job, QA Section Chief, also performed Management and Supervisory activities but 50 percent of the respondents called themselves QA Inspectors. The second job identified, Mobility Managers, was distinguished by spending 20 percent of their time performing Mobility and Contingency activities. The next job identified, Install Team Chief, separated from the cluster because these members spent 28 percent of their time Installing Ground Radio Equipment. Sixty-two percent of the Installation members reported supervising others as well as 38 percent calling themselves Engineering and Installation Team Chief. The fourth job identified, E&I Team Chief, spent 37 percent of their time Installing Ground Radio Equipment. The Install Team Chief and E&I Team Chief are somewhat similar, they are distinguished by the amount of tasks they perform. The Install Team Chiefs are more centralized in that they primarily perform installation tasks while the E&I Team Chiefs are more diverse in which they also perform assembly tasks. The last job identified in the cluster, QA Staff, was separated from the others in that 56 percent of their time was spent performing Management and Supervisory acts of Duty K. Fifty-nine percent of the QA Staff reported HQ support as their primary work area. These job incumbents perform and average of 84 task which include:

- Conduct supervisory orientations for newly assigned personnel
- Evaluate personnel for promotion, demotion, reclassification, or special awards
- Develop or establish work methods or procedures
- Schedule personnel for temporary duty assignments, leaves, or passes
- Maintain administrative files
- Conduct safety inspections of equipment or facilities
- Initiate actions required due to substandard performance of personnel
- Evaluate job hazards or compliance with the AFOSH program
- Evaluate maintenance or utilization of equipment, tools, parts, supplies, or workspace
- Evaluate effectiveness of training programs, plans or procedures
- Develop self-inspection or self-assessment program checklist
- Develop training programs, plans or procedures

Ninety-two percent of these job incumbents are AD. The predominant paygrade is E-7 with an average 14 1/2 years in the career ladder for the AD job incumbents. Thirty-five percent hold the 5-skill level and 65 percent the 7-skill level. Eighty-four percent of the people in the cluster reported supervising others (Table 4).

XIV. QUALITY ASSURANCE JOB (ST266). Comprising another 1 percent of the survey sample, these 17 airmen perform the tasks associated with managing and supervising. These

airmen devote 37 percent of their time performing the Management and Supervisory tasks of Duty J and another 34 percent of their time performing General Admin and TO activities of Duty M (table 3). They average a very low 21 tasks performed, indicating the focus of this job on quality control duties. Representative tasks performed by this job include:

- Write inspection reports
- Maintain TO libraries
- Conduct staff assistance visits, inspections, or audits
- Review TO changes
- Review TO improvement reports
- Establish or maintain ATOMS accounts
- Evaluate personnel for compliance with performance standards
- Initiate TO improvement reports
- Maintain TCTO's
- Evaluate maintenance or utilization of equipment, tools, parts, supplies, workspace
- Conduct safety inspections of equipment or facilities
- Maintain publication libraries, other than TO libraries
- Evaluate inspection report findings or inspection procedures

Eighty-eight percent of these job incumbents are AD averaging 10 years in the service. Seventy-six percent of these airmen hold the 5-skill level and 18 percent hold the 7-skill level with the predominant paygrade being E-4 and E-5. Seventy-one percent are assigned to units within the United States (Table 4).

XV. TRAINING MANAGER JOB (ST446). The 5 airmen performing this job (less than 1 percent of the survey sample) represent Ground Radio personnel who spend the most time of any other job performing Training tasks. They perform an average of 23 tasks indicating a relatively narrow job, with 43 percent of their time performing Management and Supervisory tasks (Duty K) and 34 percent of their time performing Training tasks (Duty L) as reflected in Table 3. Distinctive tasks performed include:

- Conduct staff assistance visits, inspections, or audits
- Evaluate training programs, plans, or procedures
- Evaluate training progress of trainees
- Develop training programs, plans, or procedures
- Conduct self-inspections or self-assessments
- Brief personnel concerning training programs or matters
- Write inspection reports
- Analyze core automated maintenance systems
- Maintain training records or files

Forty percent of these airmen hold the 5-skill level and 60 percent hold the 7-skill level, indicating the senior level leadership. One hundred percent of the job incumbents are AD with an average time in the career field of just 147 months and only 192 months in the service. The predominant paygrades are E-6 to E-7. Furthermore, all of these members report they are assigned to units within the United States (Table 4).

XVI. INSTRUCTOR JOB (ST202). The 42 airmen forming this job (2 percent of the survey sample) represent instructors assigned to the Ground Radio Maintenance career field. They perform an average of 24 tasks and are distinguished by spending 55 percent of their time spent on training activities. The representative tasks indicated below reflect the job with the second highest percent time spent on Ground Radio Maintenance of Duty C (Table 3). Distinct tasks performed include:

- Administer or score tests
- Evaluate progress of trainees
- Conduct formal course classroom training
- Counsel trainees on training progress
- Personalize lesson plans
- Perform task certification on students
- Perform classroom equipment management procedures
- Develop or procure training materials or aids
- Develop written tests
- Develop formal course curricula, POI's, or specialty training standards
- Inspect training materials or aids for operation

The predominant paygrades of this job are E-5 and E-6. Ninety-six percent of these airmen are AD, averaging 144 months in the career field and only 151 months in the service. Seventy-six percent of these airmen hold the 5-skill level and 24 percent hold the 7-skill level. Ninety-three percent of these members report they are assigned to units within the United States (Table 4).

Comparison to Previous Study

Table 5 lists the jobs identified in this report and compares them to the jobs of the 1994 report. All of the previous jobs matched to similar jobs in this report with the remaining 5 jobs not being identified. Of the current jobs identified, 5 new jobs emerged that dealt with a more specialized approach to Ground Radio Maintenance such as Entry-Level Maintenance, Munitions Maintenance, Ground Radio Inshop, Contingency, Contract Administration, and Maintenance Supply.

ANALYSIS OF DAFSC GROUPS

An analysis of DAFSC groups, in conjunction with the analysis of the career ladder structure, is an important part of each occupational survey. The DAFSC analysis identifies differences in tasks performed at the various skill levels. This information may then be used to evaluate how well career ladder documents, such as the AFMAN 36-2108 *Specialty Description* and the Career Field Education and Training Plan (CFETP), reflect what career ladder personnel are actually doing in the field.

The distribution of skill-level groups across the career ladder jobs is displayed in Tables 6-8, while Tables 9-11 offers another perspective by displaying the relative percent time spent on each duty across the skill-level groups. These tables reflect the distribution of AD, ANG, and AFRC personnel. A typical pattern of progression is noted within the AFSC 2E1X3 career ladder. Personnel at the 3- and 5-skill levels work in the technical jobs of the career ladder and spend most of their time on technical tasks. As incumbents move up to the 7-skill level, higher percentages work in the supervisory jobs, but many personnel still spend some time performing technical tasks.

Skill-Level Descriptions

DAFSC 2E133. Representing 17 percent of the survey sample, these 353 AD airmen perform an average of 93 tasks. Sixty-five percent of this group works in the Ground Radio Maintenance Cluster (Table 6), with 6 percent performing in the High Frequency Cluster and 3 percent in the Maintenance Control Cluster.

Table 9 reflects the percent time spent on duties by DAFSC 2E133 personnel. At the 3-skill level, the majority of their time is spent performing General Ground Radio Maintenance tasks of duty C. Representative tasks performed by these members are listed in Table 12.

DAFSC 2E153. The 1,080 members of this group account for 52 percent of the survey sample and represent the core of the career ladder. Forty-two percent work in the Ground Radio Maintenance Cluster and 14 percent in the Management/Supervisor Cluster (Table 7). This table also reflects the differences in the job distribution between the Active and Reserve Forces. The AD, ANG and AFRC spend the majority of their time at the 5-skill level performing general ground radio maintenance tasks. It also reflects the greater percentage of AD members in the Management/Supervisor cluster than the reserve forces.

Table 10 provides a comparison of the present time spent on duties for the AD and AFRC at the 5-skill level. As this table reflects, ANG and AFRC spend a much larger amount of time performing Mobility and Contingency tasks than AD.

Tables 13-16 list representative tasks performed by these DAFSC 2E153 personnel. Table 17 reflects those tasks which best differentiate the 5-skill levels from the 3-skill levels and tables 18-20 reflects those tasks which differentiate AD, ANG, and AFRC.

DAFSC 2E173. These 651 members perform an average 91 tasks and represent 31 percent of the survey sample. Table 8 shows the highest percentage of members is in the Manager/Supervisor Cluster and a high active duty percentage in the Management Cluster. This table depicts the huge difference in the way the AFRC employ their 7-skill level personnel in technical tasks versus their AD counterparts.

Table 11 reflects the percent time spent on duties by DAFSC 2E173 members. The main differences reflected by this table are the amount of time spent on Management and Supervisory tasks by the AD personnel compared to the technical tasks of the AFRC 7-skill level personnel. Representative tasks are reflected in Tables 21-24 for 7-skill level personnel. Table 25 reflects tasks which best differentiate between the 7- and 5-skill levels while tables 26-30 compares 7-skill level AD, ANG and AFRC as well as 5- and 7-skill level ANG and AFRC.

Summary

Progression in the Ground Radio Maintenance career ladder follows a regular pattern of highly technical job focus at the lower skill levels, with a broadening into supervision and management at the 7-skill level. An emphasis is clearly seen in performing primarily the core job of the Ground Radio Maintenance at the 3- and 5-skill levels, with some broadening into supervisory functions at the 5-skill level. Craftsmen at the 7-skill level are beginning to shift to supervisory jobs, but a good deal of their job time is still spent in the technical arena. ANG and AFRC 7-skill level personnel spend a much higher percentage of their time performing technical tasks versus supervisory tasks than their AD counterparts.

REPRESENTATIVE TASKS PERFORMED BY AD 2E133 PERSONNEL

TASKS		PERCENT MEMBERS PERFORMING (N=352)
C0189	Operationally check transceivers	68
C0141	Align or adjust transceivers	66
C0165	Isolate malfunctions within transceivers	66
C0143	Align or adjust UHF or VHF equipment	65
C0191	Operationally check UHF or VHF equipment	64
C0167	Isolate malfunctions within UHF or VHF equipment	64
E0370	Bench check UHF or VHF transceivers or subassemblies	64
C0127	Align or adjust exciters	63
C0162	Isolate malfunctions within receivers	63
C0135	Align or adjust power amplifiers	62
C0177	Operationally check exciters	61
C0217	Solder communications equipment components, other than high-reliability soldering	61
C0183	Operationally check power amplifiers	61
C0158	Isolate malfunctions within power amplifiers	60
E0338	Align UHF or VHF equipment or subassemblies	59
C0119	Align antenna couplers	59
C0153	Isolate malfunctions within exciters	58
F0442	Remove or replace resistors	57
E0369	Bench check UHF or VHF receivers or subassemblies	56
E0368	Bench check UHF or VHF power amplifiers or subassemblies	55
F0410	Bench check resistors	55
E0389	Remove or replace UHF or VHF equipment or subassemblies	53
E0371	Bench check UHF or VHF transmitters or subassemblies	53
C0212	Remove or replace transceivers	53
C0209	Remove or replace receivers	52
F0427	Remove or replace capacitors	52
C0215	Remove or replace UHF or VHF equipment	51
C0163	Isolate malfunctions within recorders, reproducers, or recorders-reproducers	50
C0140	Align or adjust recorders, reproducers, or recorders-reproducers	50
F0395	Bench check capacitors	50
H0479	Operationally check PA systems	49
C0188	Operationally check recorders, reproducers, or recorders-reproducers	49
C0142	Align or adjust transmitters, other than target transmitters	49
E0329	Align HF equipment or subassemblies	49
C0166	Isolate malfunctions within transmitters, other than target transmitters	48
C0190	Operationally check transmitters, other than target transmitters	48
C0213	Remove or replace transmitters	48
C0164	Isolate malfunctions within RF transmission lines	48
H0484	Set up or tear down portable PA systems	47
N0671	Inventory equipment, tools, parts, or supplies	47
C0187	Operationally check receivers, other than GPS	47
C0189	Operationally check transceivers	68
C0141	Align or adjust transceivers	66

* Average Number of Tasks Performed - 93

B0085 Install multiple-channel UHF or VHF receivers	33.10	12.50	20.60
C0146 Fabricate test adapters/cables	35.86	60.00	-24.14
N0667 Develop equipment checklists	13.10	35.00	-21.90
I0548 Set up or tear down field telephone systems	23.45	45.00	-21.55
C0119 Align antenna couplers	33.79	55.00	-21.21
N0670 Initiate requisitions for equipment, tools, parts, or supplies	20.00	40.00	-20.00

TABLE 21

REPRESENTATIVE TASKS PERFORMED BY ALL 2E173 PERSONNEL

TASKS		PERCENT MEMBERS PERFORMING (N=651)
K0586	Determine or establish work assignments or priorities	62
K0617	Write recommendations for awards or decorations	61
K0603	Evaluate personnel for compliance with performance standards	60
K0584	Counsel subordinates concerning personal matters	60
K0578	Conduct general meetings, such as staff meetings, briefings, conferences, or workshops	59
K0580	Conduct self-inspections or self-assessments	58
K0607	Inspect personnel for compliance with military standards	57
L0628	Conduct on-the-job training (OJT)	54
K0585	Determine or establish logistics requirements, such as personnel, equipment, tools, parts, supplies, or workspace	53
K0583	Conduct supervisory performance feedback sessions	53
L0638	Maintain training records or files	53
L0622	Counsel trainees on training progress	53
K0621	Write or indorse military performance reports	51
L0635	Evaluate progress of trainees	51
K0576	Assign personnel to work areas or duty positions	51
K0591	Evaluate personnel for promotion, demotion, reclassification, or special awards	51
K0579	Conduct safety inspections of equipment or facilities	51
K0598	Establish performance standards for subordinates	51
K0582	Conduct supervisory orientations for newly assigned personnel	51
K0618	Write replies to inspection reports	50
L0624	Brief personnel concerning training programs or matters	49
L0629	Determine training requirements	49
K0593	Develop or establish work schedules	49
K0608	Interpret policies, directives, or procedures for subordinates	48
K0602	Evaluate maintenance or utilization of equipment, tools, parts, supplies, or workspace	47
K0592	Develop or establish work methods or procedures	47
N0668	Evaluate serviceability of equipment, tools, parts, or supplies	47
K0614	Schedule personnel for temporary duty (TDY) assignments, leaves, or passes	46
N0671	Inventory equipment, tools, parts, or supplies	46
K0601	Evaluate job hazards or compliance with Air Force Occupational Safety and Health (AFOSH) program	45
J0568	Review maintenance records	45
M0655	Maintain administrative files	44
N0669	Identify and report equipment or supply problems	44
K0597	Establish organizational policies, such as operating instructions (OIs) or standard operating procedures (SOPs)	43
J0569	Review preventive maintenance schedules	43
K0605	Initiate actions required due to substandard performance of personnel	43
K0600	Evaluate inspection report findings or inspection procedures	42

* Average Number of Tasks Performed - 91

TRAINING ANALYSIS

Occupational survey data are one of many sources of information, which can be used to assist in the development of a training program relevant to the needs of personnel in their first enlistment. Factors which may be used in evaluating training include the overall description of the job being performed by first-enlistment personnel and their overall distribution across career ladder jobs, percentages of first-job (1-24 months TAFMS) or first-enlistment (1-48 months TAFMS) members performing specific tasks, as well as TE and TD ratings (previously explained in the **SURVEY METHODOLOGY** section).

First-Enlistment Personnel

In this study, there are 421 members in their first enlistment (1-48 months TAFMS), representing 20 percent of the total survey sample. Figure 2 reflects the distribution of first-enlistment personnel within the career ladder. Most of their duty time is spent on technical activities. Table 31 displays the relative percent of time spent on duties by first-enlistment personnel. Reviewing the table, first-enlistment personnel spend 71 percent of their time performing the technical tasks of Duties B-F. First-enlistment personnel are primarily employed in the General Ground Radio Maintenance Job.

Table 32 lists representative tasks performed by first-enlistment personnel. Most involve removing or installing components, operationally checking systems, or servicing systems. Table 33 lists the percent time spent on duties by DAFSC 2E1X3 personnel in their conventional definition of first job, 1-24 months TAFMS. Table 34 lists the representative tasks performed by these first job personnel.

Training Emphasis (TE) and Task Difficulty (TD) Data

TE and TD data are secondary factors that can assist technical school personnel in deciding which tasks should be emphasized in entry-level training. These ratings, based on the judgments of senior career ladder NCOs working at operational units in the field, are collected to provide training personnel with a rank-ordering of those tasks in the JI considered important for first-enlistment personnel training (see Table 35 for the top-rated tasks), along with a measure of the difficulty of the JI tasks (see selected high rated tasks presented in Table 36). When combined with data on the percentages of first-enlistment personnel performing tasks, comparisons can then be made to determine if training adjustments are necessary. For example, tasks receiving high ratings on both task factors, accompanied by moderate to high percentages performing, may warrant resident training. Those tasks receiving high task factor ratings, but low percentages performing, may be more appropriately planned for OJT programs within the career ladder. Low task factor ratings may highlight tasks best omitted from training for first-enlistment personnel, but this decision must be weighed against percentages of personnel performing the tasks, command concerns, and criticality of the tasks.

Table 35 presents tasks with the highest TE ratings for AFSC 2E1X3 first-enlistment airmen, while Table 36 displays those tasks AFSC 2E1X3 raters judged to be most difficult to learn. For example, TE raters (refer to Table 35) reported that tasks such as operationally checking UHF and VHF equipment systems require a lot of training emphasis and, from the data, most airmen in their first job and within their first enlistment are performing these tasks. Table 36 shows TD raters reported writing SOW's to be among the most difficult tasks to learn. However, due to the low numbers of individuals performing these types of tasks, these tasks would be inappropriate for including in a resident curriculum and is more appropriately taught as an OJT item.

Various lists of tasks, accompanied by TE and TD ratings, and where appropriate, ATI information, are contained in the TRAINING EXTRACT package and should be reviewed in detail by training school personnel. (For a more detailed explanation of TE and TD ratings, see Task Factor Administration in the **SURVEY METHODOLOGY** section of this report.)

Course Training Standard (CTS)

A comprehensive review of CTS 2E1X3, dated June 1998, compared CTS items to survey data (based on the previously mentioned assistance from subject-matter experts in matching JI tasks to CTS elements). CTS paragraphs containing general knowledge information, mandatory entries, subject-matter-knowledge-only requirements, or basic supervisory responsibilities were not examined. Task knowledge and performance elements of the CTS were compared against the standard set forth in AETCI 36-2601 and AFI 36-2623 (i.e., include tasks performed or knowledge required by 20 percent or more of the personnel in a skill level (criterion group) of the AFS).

Overall, the CTS provides very comprehensive coverage of the work performed by personnel in this career ladder, with survey data supporting all of the essential paragraphs or subparagraphs. Some elements with no proficiency codes have high percentages of personnel performing matched tasks and should be reviewed by training personnel for possible inclusion in the basic Ground Radio course (Table 37).

Tasks not referenced to any element of the CTS are listed at the end of the CTS computer listing. These tasks were reviewed to determine if there were any tasks concentrated around any particular function or job. Those technical tasks performed by 20 percent or more respondents of the CTS target groups, but which were not referenced to any CTS element, are displayed in Table 38. Training personnel and SMEs should review these unreferenced tasks to determine if inclusion in the CTS is justified.

TABLE 37

JOB SATISFACTION ANALYSIS

An examination of the job satisfaction indicators of various groups can give career ladder managers a better understanding of some of the factors which may affect the job performance of airmen in the career ladder. Attitude questions covering job interest, perceived utilization of talents and training, sense of accomplishment from work, and reenlistment intentions were included in the survey booklet to provide indications of job satisfaction.

Table 39 presents job satisfaction data for AFSC 2E1X3 TAFMS groups, together with TAFMS data for a comparative sample of Logistics career ladders surveyed in 1998. Across all three TAFMS groups, the 2E1X3 personnel rated perceptions of job interest, utilization of talents, and sense of accomplishment gained from work are slightly lower than the comparative sample. All TAFMS groups rated the utilization of training lower than the comparative sample. Reenlistment intentions are rated lower for 2E1X3 personnel than the comparative sample.

An indication of how job satisfaction perceptions have changed over time is provided in Table 40, where again TAFMS data for the current survey respondents are presented, along with data from the last occupational survey report. Reviewing this table, current survey satisfaction ratings for job interest and perceived utilization of talents are lower than the previous survey across all TAFMS groups. The first enlistment and career groups rated utilization of training lower than the previous survey, while the second enlistment group was rated much lower. Reenlistment intentions for first- and second-enlistment airmen are much lower than the previous survey. Although the career airmen's intentions are much lower than the previous survey, they are higher than the first and second enlistment intentions.

In Table 41, a review of the job satisfaction data for personnel in the specialty jobs identified in this survey reveals very low satisfaction ratings for the Public Address Installation, Contingency, LMR Manager and Munitions Support jobs. It is not surprising to note the Management job and the Training job show relatively higher ratings than the other jobs.

IMPLICATIONS

This survey was initiated to provide current job and task data for use in evaluating the AFMAN 36-2108 *Specialty Description* and appropriate training documents.

Survey results clearly indicate that the present classification structure, as described in the latest specialty description, accurately portrays the jobs performed in this career ladder. Career ladder training documents appear, on the whole, to be well supported by survey data. As was pointed out in the **JOB SATISFACTION ANALYSIS** section, job satisfaction responses by AFSC 2E1X3 personnel reported the utilization of training is adequate, thus indicating support for the overall training system. The remaining job satisfaction indicators of job interest, perceived utilization of talents, sense of accomplishment from work, and reenlistment intentions were rated slightly lower than both the comparative sample and previous survey for first- and second-enlistment personnel. Additionally, the career ladder progression is good, with the move from technical work at the 3- and 5-skill levels to supervisory and management at the 7-skill level.

APPENDIX A

**SELECTED REPRESENTATIVE TASKS PERFORMED
BY SPECIALTY JOB GROUPS**

THIS PAGE INTENTIONALLY LEFT BLANK

TABLE A1
MAINTENANCE CONTROL CLUSTER (ST70)

TASKS	PERCENT MEMBERS PERFORMING (N=66)
J0559 Analyze core automated maintenance system (CAMS) or G081 data	73
J0568 Review maintenance records	73
J0567 Retrieve CAMS or G081 listings or reports	71
J0569 Review preventive maintenance schedules	70
J0563 Initiate or annotate maintenance records	64
J0571 Update maintenance data collection (MDC) data in CAMS or G081	59
J0560 Coordinate repair actions between users and contractors	47
J0574 Verify accuracy of CAMS or G081 daily inputs	45
J0572 Update personnel data files in CAMS or G081	42
J0570 Update historical reports in CAMS or G081	39
N0666 Coordinate maintenance of equipment with appropriate agencies	36
M0659 Maintain or update status indicators, such as boards, graphs, or charts	33
L0628 Conduct on-the-job training (OJT)	33
L0638 Maintain training records or files	32
J0573 Update workcenter training reports in CAMS or G081	30
J0558 Adjust daily maintenance plans to meet operational commitments	29
M0655 Maintain administrative files	29
M0644 Compile data for records, reports, logs, or trend analyses	21
K0578 Conduct general meetings, such as staff meetings, briefings, conferences, or workshops	20
M0653 Initiate or maintain standby rosters or workcenter pyramid recall rosters	17
J0564 Initiate or coordinate deficiency, service, or status reports, such as RODs	12

TABLE A2
HIGH FREQUENCY CLUSTER (ST97)

TASKS		PERCENT MEMBERS PERFORMING (N=72)
F0442	Remove or replace resistors	82
F0427	Remove or replace capacitors	79
F0410	Bench check resistors	74
F0395	Bench check capacitors	71
F0441	Remove or replace relays	69
F0409	Bench check relays	69
C0135	Align or adjust power amplifiers	68
C0217	Solder communications equipment components, other than high-reliability soldering	68
C0183	Operationally check power amplifiers	67
C0158	Isolate malfunctions within power amplifiers	64
F0453	Remove or replace zener diodes	64
E0380	Remove or replace HF equipment or subassemblies	61
C0127	Align or adjust exciters	61
E0329	Align HF equipment or subassemblies	60
F0421	Bench check zener diodes	60
F0413	Bench check solid-state diodes	58
C0153	Isolate malfunctions within exciters	57
F0445	Remove or replace solid-state diodes	57
F0432	Remove or replace electron tubes	54
C0177	Operationally check exciters	53
F0422	Perform high-reliability soldering	51
E0351	Bench check HF power amplifiers or subassemblies	50
E0350	Bench check HF exciters or subassemblies	50
C0131	Align or adjust independent/single sideband equipment	49
N0671	Inventory equipment, tools, parts, or supplies	49
C0214	Remove or replace tubes	47
F0417	Bench check transformers	47
F0433	Remove or replace ICs	46
L0628	Conduct on-the-job training (OJT)	46
F0434	Remove or replace inductors	46
F0449	Remove or replace transformers	46
F0402	Bench check inductors	44
C0180	Operationally check independent/single sideband equipment	43
F0401	Bench check integrated circuits (ICs)	43
N0668	Evaluate serviceability of equipment, tools, parts, or supplies	43
C0155	Isolate malfunctions within independent/single sideband equipment	42
F0408	Bench check positive intrinsic negative (PIN) diodes	42
F0405	Bench check light-emitting diodes (LEDs)	42
N0670	Initiate requisitions for equipment, tools, parts, or supplies	40
F0440	Remove or replace PIN diodes	39
C0199	Remove or replace exciters	39

TABLE A3

PA INSTALLATION JOB (ST340)

TASKS		PERCENT MEMBERS PERFORMING (N=17)
H0479	Operationally check PA systems	94
H0472	Conduct location surveys for PA systems	88
H0484	Set up or tear down portable PA systems	82
H0474	Coordinate support requests for PA systems with appropriate agencies	82
H0469	Align or adjust public address (PA) systems	82
H0475	Fabricate audio cables for PA systems	82
H0476	Install fixed PA systems	59
H0473	Coordinate purchases of PA systems or equipment with appropriate agencies	59
H0470	Bench check PA system components	41
H0477	Isolate malfunctions within PA systems to LRUs	35
H0486	Supply press feeds to news media	35
L0628	Conduct on-the-job training (OJT)	29
H0482	Remove or replace PA system LRUs	24
B0068	Install microphones or microphone jacks	24
I0556	Transport PA systems or equipment to or from deployed locations	24
B0035	Assemble or wire equipment components for installation	18
C0177	Operationally check exciters	18
C0165	Isolate malfunctions within transceivers	18
L0638	Maintain training records or files	12
B0036	Conduct installation site surveys	12
H0481	Remove or replace PA system discrete components	12
C0181	Operationally check LMR equipment	12
C0141	Align or adjust transceivers	12
H0480	Operationally check SLTSs	12
I0507	Fabricate RF cables	12
D0288	Operationally check public address systems	6
D0231	Align or adjust intercom systems	6
L0642	Prepare job qualification standards (JQSs)	6
H0478	Isolate malfunctions within SLTSs to LRUs	6

TABLE A4
PUBLIC ADDRESS CLUSTER (ST110)

TASKS	PERCENT MEMBERS PERFORMING (N=61)	
H0484	Set up or tear down portable PA systems	95

H0479	Operationally check PA systems	89
H0475	Fabricate audio cables for PA systems	89
H0472	Conduct location surveys for PA systems	87
H0470	Bench check PA system components	84
H0474	Coordinate support requests for PA systems with appropriate agencies	79
H0476	Install fixed PA systems	77
H0473	Coordinate purchases of PA systems or equipment with appropriate agencies	75
H0477	Isolate malfunctions within PA systems to LRUs	69
C0141	Align or adjust transceivers	59
D0288	Operationally check public address systems	52
C0189	Operationally check transceivers	52
C0143	Align or adjust UHF or VHF equipment	51
L0628	Conduct on-the-job training (OJT)	51
C0191	Operationally check UHF or VHF equipment	48
K0586	Determine or establish work assignments or priorities	46
H0486	Supply press feeds to news media	44
H0481	Remove or replace PA system discrete components	44
H0482	Remove or replace PA system LRUs	44
K0621	Write or indorse military performance reports	44
C0167	Isolate malfunctions within UHF or VHF equipment	44
C0135	Align or adjust power amplifiers	43
K0583	Conduct supervisory performance feedback sessions	43
C0165	Isolate malfunctions within transceivers	43
C0188	Operationally check recorders, reproducers, or recorders-reproducers	41
C0162	Isolate malfunctions within receivers	41
C0140	Align or adjust recorders, reproducers, or recorders-reproducers	39
K0603	Evaluate personnel for compliance with performance standards	39
C0119	Align antenna couplers	39
C0127	Align or adjust exciters	38
C0183	Operationally check power amplifiers	38
J0569	Review preventive maintenance schedules	38
F0410	Bench check resistors	38
K0617	Write recommendations for awards or decorations	38
L0638	Maintain training records or files	38
L0622	Counsel trainees on training progress	38
C0163	Isolate malfunctions within recorders, reproducers, or recorders-reproducers	36
J0571	Update maintenance data collection (MDC) data in CAMS or G081	36
N0668	Evaluate serviceability of equipment, tools, parts, or supplies	36
K0579	Conduct safety inspections of equipment or facilities	36

TABLE A5
ENTRY-LEVEL MAINTENANCE JOB (ST408)

TASKS	PERCENT MEMBERS PERFORMING (N=10)
C0162 Isolate malfunctions within receivers	100
E0352 Bench check HF receivers or subassemblies	100
E0329 Align HF equipment or subassemblies	90
C0139 Align or adjust receivers, other than DF receivers	90
C0187 Operationally check receivers, other than GPS	80
E0380 Remove or replace HF equipment or subassemblies	80
F0395 Bench check capacitors	80
C0209 Remove or replace receivers	80
C0155 Isolate malfunctions within independent/single sideband equipment	70
C0131 Align or adjust independent/single sideband equipment	70
F0410 Bench check resistors	70
E0373 Perform corrosion prevention on GRCE	60
E0335 Align sideband equipment or subassemblies	50
C0180 Operationally check independent/single sideband equipment	50
F0442 Remove or replace resistors	50
C0202 Remove or replace independent/single sideband system LRUs	50
F0427 Remove or replace capacitors	50
C0217 Solder communications equipment components, other than high-reliability soldering	50
F0401 Bench check integrated circuits (ICs)	50
C0168 Lubricate mechanical parts of GRCE	40
D0276 Operationally check communications patch panels	40
F0422 Perform high-reliability soldering	40
N0673 Maintain documentation on items requiring periodic inspections or calibrations	40
N0675 Pick up, deliver, or store equipment, tools, parts, or supplies, other than for mobilities or contingencies	40
J0571 Update maintenance data collection (MDC) data in CAMS or G081	30
C0132 Align or adjust internal circuitry of GRCE	20

K0579 Conduct safety inspections of equipment or facilities	55
K0605 Initiate actions required due to substandard performance of personnel	55
K0601 Evaluate job hazards or compliance with Air Force Occupational Safety and Health (AFOSH) program	54
K0602 Evaluate maintenance or utilization of equipment, tools, parts, supplies, or workspace	51
L0634 Evaluate effectiveness of training programs, plans, or procedures	50
K0590 Develop self-inspection or self-assessment program checklists	50
K0612 Review drafts of supplements or changes to directives, such as policy directives, instructions, or manuals	49
L0630 Develop training programs, plans, or procedures	49
J0559 Analyze core automated maintenance system (CAMS) or G081 data	49
J0568 Review maintenance records	48
K0611 Review budget requirements	47
J0569 Review preventive maintenance schedules	47
K0594 Draft budget requirements	47
K0604 Implement safety or security programs	47
K0577 Assign sponsors for newly assigned personnel	46
N0669 Identify and report equipment or supply problems	45
N0666 Coordinate maintenance of equipment with appropriate agencies	44
K0615 Write inspection reports	43
N0668 Evaluate serviceability of equipment, tools, parts, or supplies	43
K0596 Draft supplements or changes to directives, such as policy directives, instructions, or manuals	40
J0567 Retrieve CAMS or G081 listings or reports	39
K0581 Conduct staff assistance visits, inspections, or audits	33

TABLE A14
QUALITY ASSURANCE JOB (ST266)

TASKS		PERCENT MEMBERS PERFORMING (N=17)
K0615	Write inspection reports	88
M0657	Maintain TO libraries	82
K0581	Conduct staff assistance visits, inspections, or audits	82
M0663	Review TO changes	76
M0664	Review TO improvement reports	76
M0648	Establish or maintain automated technical order management system (ATOMS) accounts	71
K0603	Evaluate personnel for compliance with performance standards	65
M0652	Initiate technical order (TO) improvement reports	65
M0658	Maintain TCTOs	59
K0602	Evaluate maintenance or utilization of equipment, tools, parts, supplies, or workspace	53
K0579	Conduct safety inspections of equipment or facilities	53
M0656	Maintain publications libraries, other than TO libraries	53
K0600	Evaluate inspection report findings or inspection procedures	47
A0017	Perform QAE performance evaluations	41
M0644	Compile data for records, reports, logs, or trend analyses	41
N0668	Evaluate serviceability of equipment, tools, parts, or supplies	41
M0661	Perform TCTO inspections	41
K0601	Evaluate job hazards or compliance with Air Force Occupational Safety and Health (AFOSH) program	35
N0667	Develop equipment checklists	29
K0578	Conduct general meetings, such as staff meetings, briefings, conferences, or workshops	24
K0580	Conduct self-inspections or self-assessments	24
J0569	Review preventive maintenance schedules	24
K0607	Inspect personnel for compliance with military standards	24

TABLE A15

TRAINING MANAGERS JOB (ST446)

TASKS		PERCENT MEMBERS PERFORMING (N=5)
K0581	Conduct staff assistance visits, inspections, or audits	100
L0634	Evaluate effectiveness of training programs, plans, or procedures	100
L0635	Evaluate progress of trainees	100
L0630	Develop training programs, plans, or procedures	100
K0580	Conduct self-inspections or self-assessments	80
L0624	Brief personnel concerning training programs or matters	60
K0578	Conduct general meetings, such as staff meetings, briefings, conferences, or workshops	60
K0615	Write inspection reports	60
J0559	Analyze core automated maintenance system (CAMS) or G081 data	60
